# TerraInsight

Driving Business Sustainability Transformation

**A Deep-Tech Startup Originated from Kyoto University,
Providing an Integrated Water Resources Management Platform.**

We provide a Saas platform that collects, analyzes, evaluates, and integrates Water-Related Insights — such as Disasters, Agriculture, Industry, Urban Life, Vegetation, Renewable Energy, Ecosystem Services, and more. This platform is powered by global big data on Water Resources and Water Stress, taking into account the Impact of Climate Change.
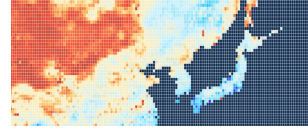

Water Resources and Water Stress in all areas

Water Resources　　Water Stress　　Water Runoff

High-Resolution Databases for priority areas.

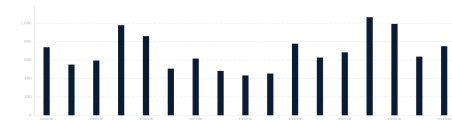

Satellite Imagery　　High-Resolution Maps　　Mask Processing

Providing customized Dashboards and Features.

Time series Analysis　　Heatmap analysis

Industry-specific Risk Analysis　　Reporting functionalities

We are committed to fostering global partnerships to achieve sustainable water utilization, advanced water disaster countermeasures, and resilient water security in the Southeast Asia region by utilizing cutting-edge integrated water resources management technologies.
